

I was informed that there will be a possibility of my radio station K-Love being forced off the air due to new FCC rule changes. Please don't let this happen. My family dearly loves the positive messages that this radio station provides to so many families in the US. My family has been listening to K-love in San Antonio, TX for over two years. We have it on our car and house presets and as a mother of two young boys I really appreciate the positive music (no questionable lyrics on this station) and the positive messages it is sending to my sons. I know that a lot of the people that go to our church are also touched by K-Love. We get concert information on the air of our favorite artists, as well as upcoming events in our area to help out many non profit organizations. Since it is a listener funded radio station, we the contributing families, would lose out the most. It is our way of helping others listen to the message of Jesus Christ all across the country and even the world. It really does provide a great service to all who listen. Thank you for your consideration in this matter.
